

VIEW OF ZINN LUMBER PLANT AND SITE OF NEW BUILDING

The sketch shows the whole Zinn Lumber Co. plant as it now stands. At the upper left are huge lumber piles which are to be covered by a new building soon to be erected, thus completing the present Zinn program.

A new warehouse, 100 by 100 feet, is to be built by the Zinn Lumber Co. soon to complete the big building program undertaken by that company.

It will be the fifth unit of the great plant, and will place under cover 1,000,000 more feet of framing lumber.

It will contain two concrete driveways with concrete piling forms and will be of the latest approved type of warehouse construction. The fire-proof roofing will be from Zinn's own roofing stocks.

ENTIRE PLANT REBUILT.

Ever since the fire wiped out the old frame structures, Zinn has been undergoing entire rebuilding, increased business and greater efficiency more than compensating for the fire loss, according to Zinn officials.

The first unit of the Zinn plant is the hardware building, with 60 feet on N. High-st. Lawn furniture and trellis business has tripled in size as a result of the conveniences afforded by the new two-story structure.

The mill proper, the second unit, occupies 145 feet on E. Hudson-st and has a floor space of 22,900 square feet.

ROOFING WAREHOUSE.

On another corner of E. Hudson-st and High-st is the two-story brick roofing warehouse, fronting 55 feet on High-st with a depth of 165 feet. Its capacity is 25 carloads.

Behind the roofing warehouse stands the one-half million feet capacity siding warehouse in connection with the yard stocks of framing lumber.

In the mill building the company's up-to-the-minute woodworking machinery is constantly operating at capacity. Frame making and cabinet work keep men busy on the second floor.

PLANS ARE FREE.

The sash manufacturing department is on the second floor of the hardware building.

The company has an architectural department which draws without charge plans for anything.

The Zinn Co. is the second oldest retail lumber company in Columbus in business under the same name and management, and in the same

location since its organization.

The company has adopted a vivid orange as its color and a large "Z" as its trademark.

Typical of the spirit of the Zinn organization is this sentence from a recent letter to patrons of the company:

"Thirty-four years' experience has taught us that business grows proportionately with the service rendered—and we are growing—so is our list of friends and customers."

Other executives besides the president, J. H. Zinn, are: M. A. Gran- nan, general manager; H. A. Coe, sales manager, and J. E. Stewart, credit and advertising manager.

THE OHIO STATE JOURNAL, COLUMBUS, SUNDAY MORNING, MAY 31, 1926

Modern Motor Outfit Delivers Zinn's Lumber

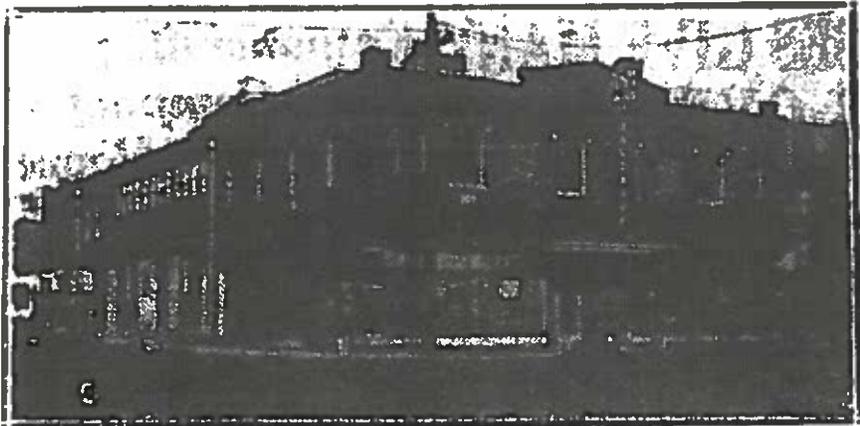

The first delivery of lumber to an Ohio State Journal home was made by one of the modern motor outfits of the Zinn Lumber Co. This company operates a fleet of Fordson tractor outfits and a delivery can be made from the Zinn yards at North Columbus to Heed & Holton's B goodview Addition in less time than a horse drawn vehicle could make the trip to Chittenden Ave.

The lumber pictured above is being unloaded at the site of "Long Gables," The State Journal home under construction in Broadview. Orr & Day, builders of this home, are at the receiving end.

Brick Bond Aid to Strength and Beauty of Home

Hard in brickwork, a true test of the brick is the mortar. Mortar is applied along the length of the wall through the holes in the bricks and laid them together in a solid mass. It is the mortar is used to cement the brick together into a monolithic whole. The real bond is the overlapping of the brick which the mortar serves to maintain.

A glance at an old wall will make this clear as far as the outer surface of the wall is concerned. It will be seen that the brick, instead of resting on the ground, are shifted one above the other, and the mortar is used to fill the spaces between them.

The new storeroom of the Zinn Lumber Co. at Hudson and High Sts. This building will house the builders' hardware department soon to be installed by this successful North Side lumber company.

Dispatch 11/14/1925

Seven persons were injured in an \$4,500 blaze, which destroyed the sawing mill, storeroom and lumber supply of the H. J. Zinn Lumber Co., at Hulse street and East avenue, last Monday night, and damaged several nearby homes and a church.

While no estimate of the damage could be obtained from officials of the company, the fire department officials place the loss at \$60,000 on the contents of the Zinn Lumber Co. building and valued the structure at \$17,000. Fifty-five hundred dollars' damage was done the other buildings.

CAUSE IS UNKNOWN.

Many theories were advanced regarding the cause of the flames by

Student Spectator of \$80,000 Zinn Co. Fire Killed in Fall

was struck upon before it had been built, which damaged the steel mill, machinery and lumber yard of the U. S. Zinc Lumber Co., a fire which had damaged the steel mill and a structure on the site of the damaged mill in 1918. The damage to the mill was estimated at \$80,000. The U. S. Zinc Lumber Co. building at 1211 West 12th street, owned by the Zinn Co., was destroyed by the fire. The fire was caused by a short circuit in the wiring.

CAUSE OF DISASTER.
The cause of the disaster was a short circuit in the wiring of the steel mill. The fire started in the mill and spread to the lumber yard. The fire was caused by a short circuit in the wiring. The fire was caused by a short circuit in the wiring.

REMARKS BY SHERIFF.
The sheriff of the county said that the fire was caused by a short circuit in the wiring. The fire was caused by a short circuit in the wiring. The fire was caused by a short circuit in the wiring.

Auto Owners Must Use License Plates

The state has enacted a law which requires auto owners to use license plates. The law is designed to increase the revenue of the state and to provide a means of identifying the vehicles.

Deaths Among WPA.

Deaths among the WPA workers were reported. The deaths were caused by various causes, including accidents and illness.
