

Plenty of Parking for Drive-In Customers! *at the New Jerry's*

An extensive "service island" is as much a part of Jerry's as the delicious hamburgers and French fries.

Neatly attired women meticulously prepare the foods served at the Drive-in—in a spotless kitchen.

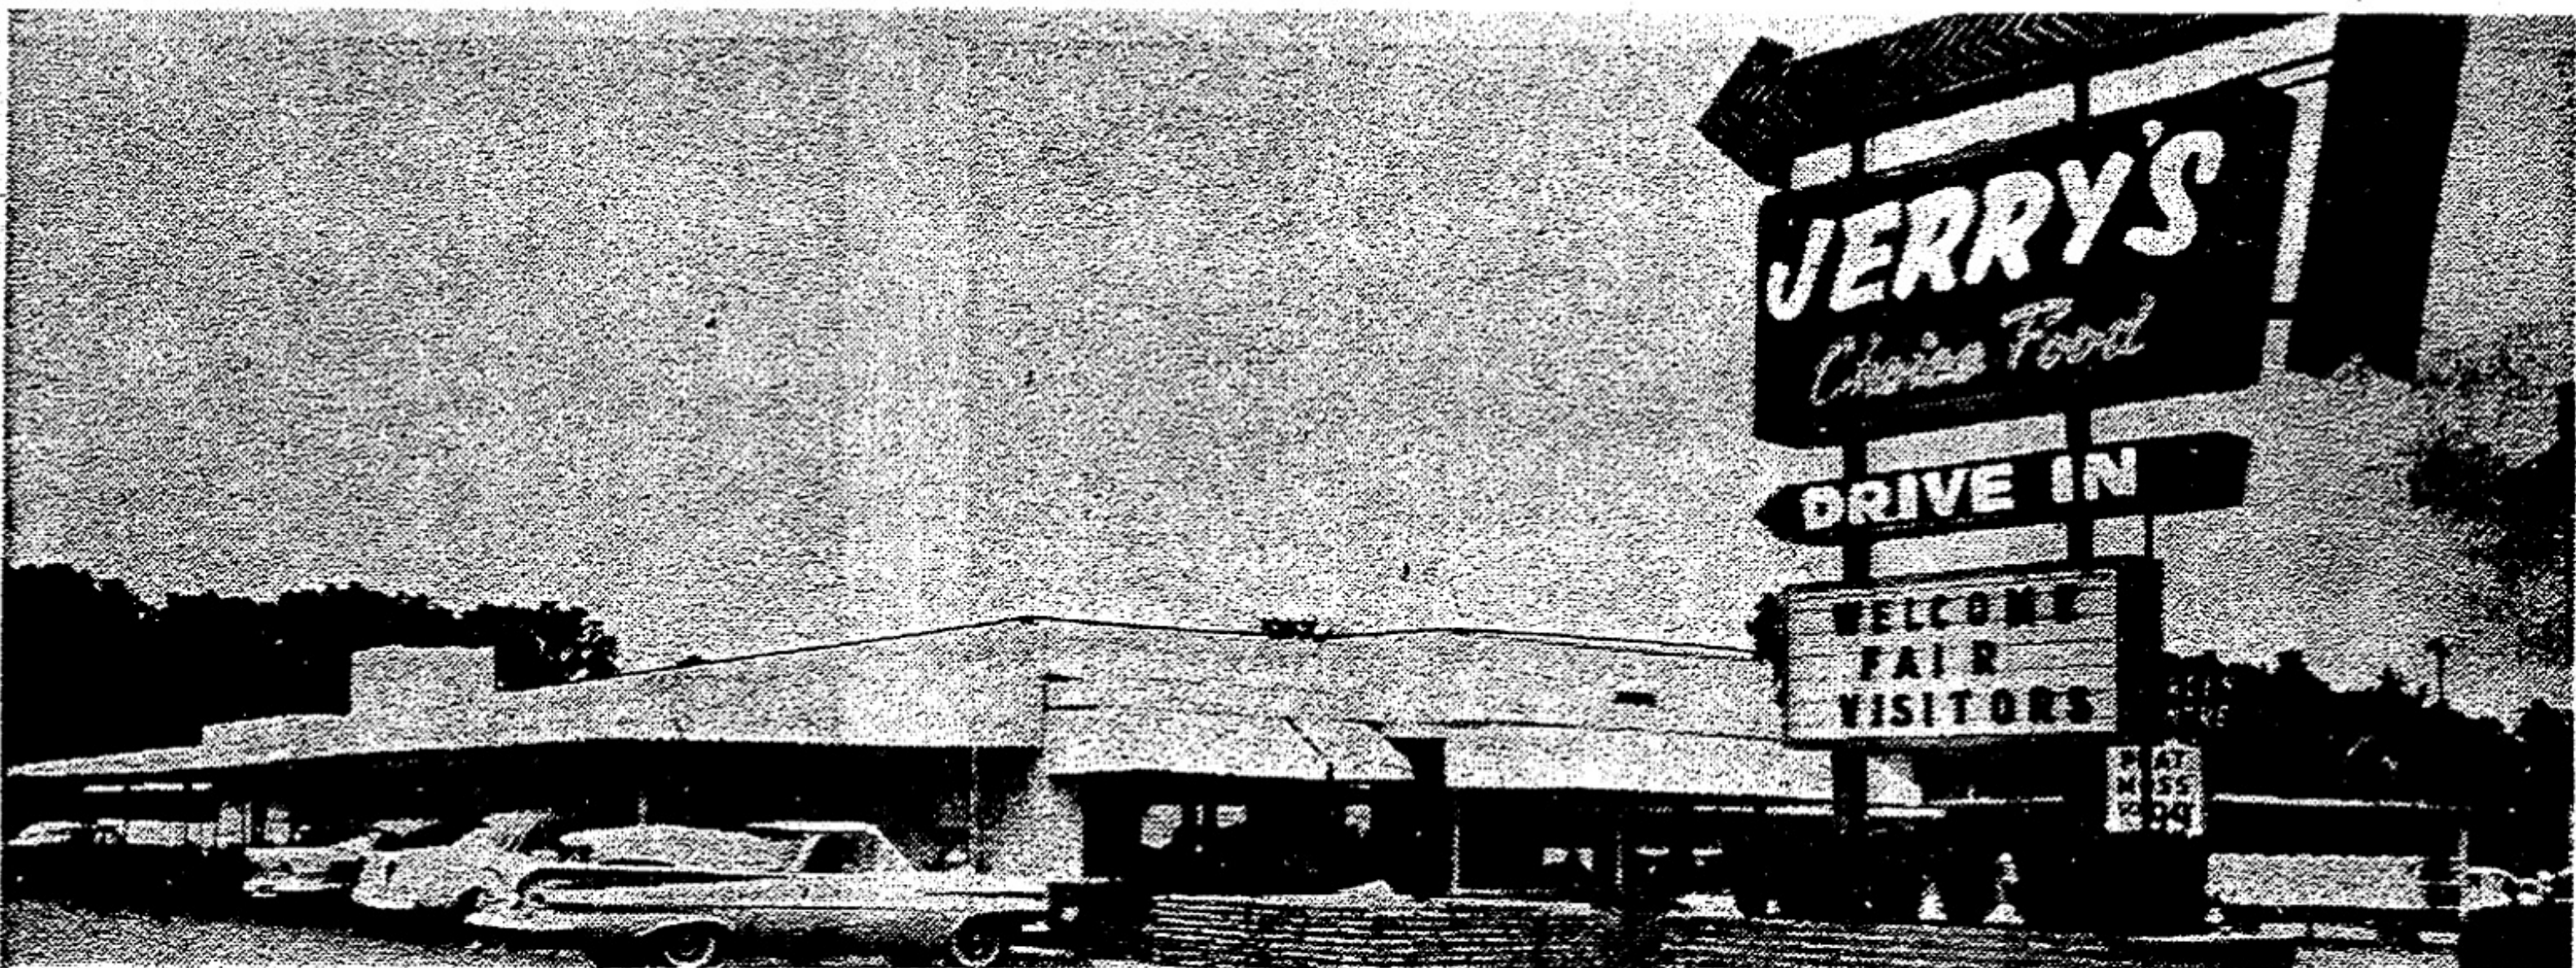

The main All-Gas service kitchen gleams with its stainless steel equipment—symbolic of the scrupulous care given in food preparation.

Food preparation is paramount—and here are the men in charge. Left to right Harold Holland, chef; Howard Coventry, chef, and Eddie Kimsey, head chef.

The original "JERRY'S" at 3140 Olentangy River Road

Friendly, prompt service has made the original "Jerry's Drive-in" one of the City's most popular eating spots. It will continue to

serve the thousands of patrons whose steady patronage has made it a famous name in Columbus and Central Ohio.
